Nebraska prescribes more outpatient antibiotics than 42 other states and is in the bottom half of states for antibiotic appropriateness according to recent CDC data.

In accordance with national and state goals to reduce inappropriate antibiotic prescribing and improve patient outcomes the Nebraska Antimicrobial Stewardship Assessment and Promotion Program (ASAP) is seeking **Urgent Care Clinics** interested in improving the management of acute respiratory infections (ARI).

BENEFITS OF PARTICIPATION

- ☞ Online educational training on management of ARI
- ☞ Training in communication strategies to improve patient acceptance of recommendations
- ☞ Free CME/CNE credits upon completion of educational training
- ☞ Access to prescriber posters and pocket cards on ARI and patient empowerment posters

REQUIREMENT FOR PARTICIPATION

- ☞ Designate a single provider (MD, DO, APRN, or PA) as clinic champion to support antimicrobial stewardship efforts
- ☞ Complete online educational training
- ☞ Distribute treatment pocket cards to clinic providers
- ☞ Post prescriber and patient empowerment posters in the clinic
