

## Bamlanivimab Data Collection Requirements

We are now required to report to the ASPR team every Thursday by 11 am EST on distribution of Bamlanivimab. We have created a Redcap survey for facilities to capture the necessary data. Please disseminate the below link to the LTCF.

There are 14 and 28 day follow up questions, to be able to access the follow up questions you will need to select the “save and return later” option after entering the initial data. This will provide them with a code and an automatically generated email with a link to be able to access the survey again to complete the follow up response. Please record the code and email link in a spreadsheet to be able to access when needed.

Patient Data Code Link -
